Hello, my name is Muhammad HamzaTariq, a University of Wah graduate with knowledge in Flutter Development. My expertise is in Flutter development. In my work, I specialize in the implementation of Flutter development

📁 Professional Experience

Flutter Developer Intern

08/2025 – 10/2025

Remote

Assisted in building scalable and user-friendly mobile applications using Flutter. Implemented real-time data features using Firebase services. Contributed to UI/UX improvements and performance optimization. Strengthened skills in API integration, state management & debugging

Flutter Developer Intern

08/2025 – 09/2025

Remote

Worked on developing cross-platform mobile apps using Flutter (Dart). Built responsive UI and integrated Firebase Authentication & Firestore. Focused on clean code structure, state management, and user experience. Collaborated with senior developers on real-world projects

📁 Projects

Fitness Tracker App, *Flutter Developer Intern*

08/2025 – 08/2025

A mobile app that helps users monitor their daily fitness activities and stay motivated towards a healthier lifestyle.

Track daily activities such as steps, workouts, and calories burned

Manually log fitness data including workout type, duration, and calories

Dashboard displaying daily and weekly progress with graphs and progress bars

Clean, intuitive, and user-friendly UI for seamless navigation

Data storage implemented using Firebase for secure and real-time syncing

Local storage options (SQLite) also integrated for offline usage.

Smart Personal FirstAid Box with AI-Powered Health Chatbot Mobile Application, *FYP*

10/2024 – 05/2025

Tech Stack: **React Native** (Frontend), **MongoDB** (Backend)

A mobile application designed to assist users in managing first-aid essentials and provide instant health support through an AI-powered chatbot.

Developed user-friendly frontend using React Native for cross-platform support

Implemented secure and scalable backend with MongoDB

Integrated an AI chatbot for health-related queries and quick guidance

Allows users to track, manage, and restock first-aid items efficiently

Focused on clean UI, real-time responses, and smooth user experience

Intern Management System, Flutter Developer Intern

08/2025 – 08/2025

Developed a cross-platform mobile app using Flutter to manage intern profiles, tasks, and progress tracking.

Implemented secure authentication with Firebase Authentication.

Created real-time dashboards for interns and admins using Cloud Firestore.

Built admin features to add, update, and review intern details and assigned tasks.

Focused on clean UI design and seamless user experience

AI-Powered Resume Builder, Flutter Developer Intern

09/2025 – 09/2025

Developed a mobile app using Flutter to help users create professional resumes with AI-driven suggestions.

Integrated AI services (OpenAI API) to provide smart, role-based resume recommendations.

Designed customizable resume templates with export options in PDF format.

- Implemented Firebase for secure user authentication and data storage.

Enhanced user experience with smooth UI and easy profile import from LinkedIn.

Noor e Azkar

12/2025 – 01/2026

- Built an all-in-one app with Duas, Tasbeeh counter, and Surah reader using Clean Architecture and Riverpod.
- Implemented offline-first functionality with SQLite/Hive and integrated Firebase for secure backend services.
- Optimized UI/UX with haptic feedback, RTL support, and dynamic theming for better user engagement.

Skills

- Mobile App Development
- Flutter Development
- Dart Programming
- Firebase Integration
- REST API Development
